The BD-F7500 is an aesthetic study in black and silver, simultaneously modern, yet classic. Its minimalist high-gloss black finish contrasts with the unit's aluminum trim, and complements the same design qualities found on many high-end flat-panel displays that feature black lacquered finishes set off by silver bezels. The BD-F7500's video processor improves the visual quality of block-based low bit-rate coded images and reduces blocking artifacts. This is especially important for maximizing the visual quality of content streamed from the Internet, as well as improving the quality of picture sharpness.

TERK **L-30S** 2.4 GHz Wireless Audio/Video Transmitter and Receiver System

Imagine having your A/V components (satellite receiver, DVR, DVD player or a camcorder) in one room and the ability to watch them in another room, even multiple rooms, without running wires. Or being able to listen to your computer's MP3 collection on a pair of powered speakers in another room? Terk's Leapfrog LF-30S is a wireless transmitter/receiver system that does just that. It also gives you the ability to control the A/V source from the other room, so you can actually change the channels on your satellite receiver from the second TV's location. With the purchase of additional receivers, you can use it with multiple TV's throughout your home. *(TELF30S)*..... **62.18**
